EDUCATION

J.C. Bose University of Sciences and Technology, YMCA

B.Tech. in Computer Science and Engineering

Sep 2023 - June 2027

EXPERIENCE

Full Stack Developer Intern

Nov 2025 - Feb 2026

03h Technology (Krutanic)

- Developed MERN stack applications with real-time user interaction features
- Assisted in optimizing API performance by improving backend logic and database queries
- Implemented secure Authentication using JWT for user data protection
- Collaborated with team members in Agile environment to deliver features on time
- Deployed applications and supported CI/CD pipeline processes, Real-time Systems
- Responsive Design, Agile Development, Payment Integration, Multi-role Dashboards, Event-driven Architecture

PROJECTS

DentWise - AI Dental SaaS | [\[Link\]](#) | [\[GitHub\]](#) | *Next.js 15, TypeScript, PostgreSQL,*

Feb 2025 - May 2026

Vapi AI, GPT-4o, Clerk Auth, Prisma ORM, Resend

- Integrated Vapi AI and GPT-4o to develop a 24/7 automated voice consultation system, resolving dental queries in real-time
- Implemented secure multi-role dashboards and automated appointment scheduling flows using Clerk Auth and Prisma ORM
- Optimized performance with Next.js Server Actions, featuring responsive UI, dynamic subscription plans, and automated email notifications via Resend

ProCourse - E-Learning Platform | [\[Link\]](#) | [\[GitHub\]](#) | *MERN Stack, Stripe, Cloudinary, Atlas*

Set 2024 - Jun 2025

- Developed a full-stack Learning Management System featuring course browsing, enrollment, processing integrated via Stripe API
- Built an advanced admin dashboard for real-time course management (CRUD operations), purchase tracking, and user data monitoring
- Optimized media handling with Cloudinary for image/video storage and architected a scalable database using MongoDB Atlas

Dora AI - Generative Website Builder | [\[Link\]](#) | [\[GitHub\]](#) | *MERN Stack, OpenAI API,*

Oct 2024 - May 2025

GPT-4, Razorpay, Tailwind CSS, Redux Toolkit, MongoDB

- Developed a platform that generates complete, production-grade websites from text prompts using OpenAI's GPT-4, featuring a mobile-first responsive layout engine
- Implemented a credit-based monetization system with Razorpay integration, allowing users to securely purchase generation tokens
- Engineered a real-time website editor with live preview mode, enabling users to modify generated content and export clean HTML/CSS code instantly
- Built a personalized dashboard using Redux Toolkit and MongoDB to manage user-generated sites, credit balances, and deployment history

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, Framer Motion, HTML, CSS

Backend: Node.js, Express, Spring Boot, REST APIs, Prisma ORM, Hibernate

Databases: MySQL, PostgreSQL, MongoDB, MongoDB Atlas

DevOps/Cloud: AWS (EC2, S3, Lambda, DynamoDB), Docker, Kubernetes, Git, Linux

Core Concepts: Data Structures & Algorithms, System Design, Object-Oriented Programming, Operating Systems, DBMS, Distributed Systems, Computer Networks

Tools: Git, GitHub, Postman, Vercel, Cloudinary, Stripe, Razorpay, Clerk Auth, Vapi AI, GPT-4o, OpenAI API

CERTIFICATIONS

Professional Internship Certificate – Krutanic(Adobe)|Feb2026

Postman API Fundamentals Student Expert – Postman|Dec2025

University Project Excellence Award – J.C.BoseUniversity(YMCA)|Nov2025

Problem Solving Excellence Award – GeeksforGeeks|Nov2025
